

## REPLACE A BR08 BOARD FOR A BR08I BOARD

### Replace a BR08 board for a BR08I board.

The boards are fully interchangeable but there are some small differences

The Battery(accu) and Motor(M) connections are marked, and at the same place. Only at the new BR08I board they are bigger so install new eye connectors with diameter M6.

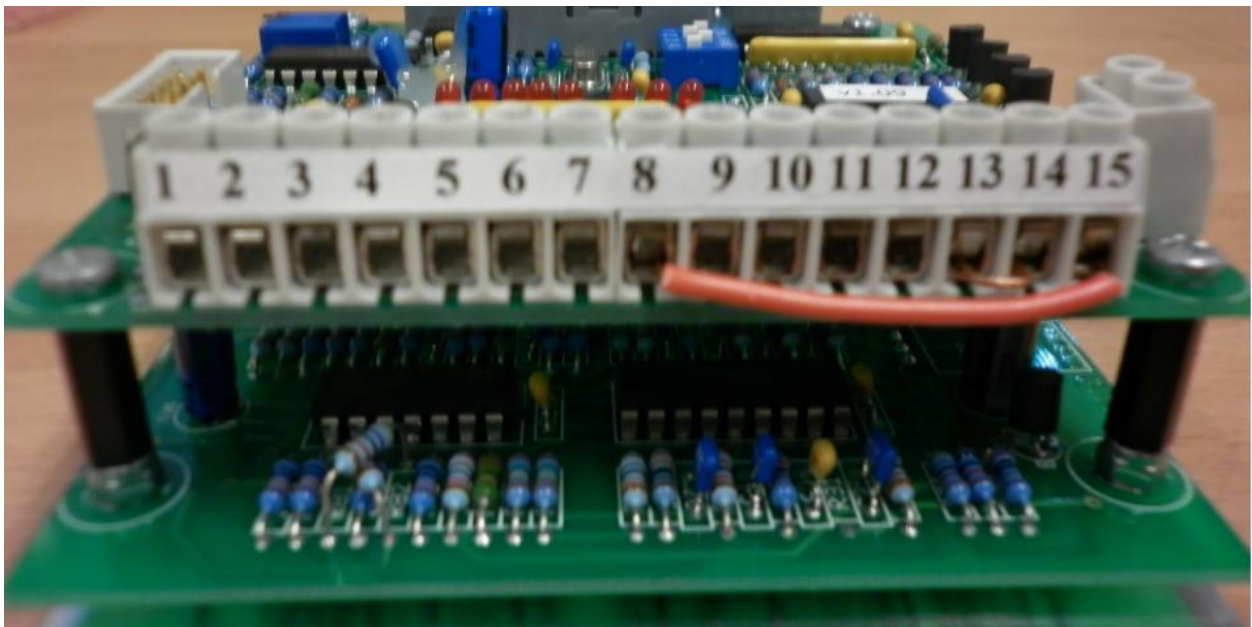

Old BR08 Board

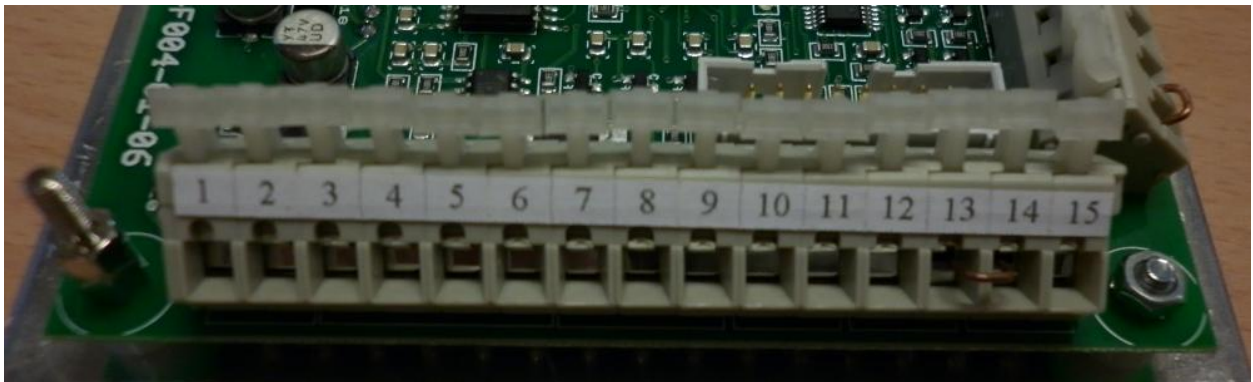

New BR08I Board

The connections from the outputs and inputs are marked with numbers.

BR08 Board

On the BR08I Board the connections has the same numbers.

BR08I Board.

Connect all the wires at the same connector number.

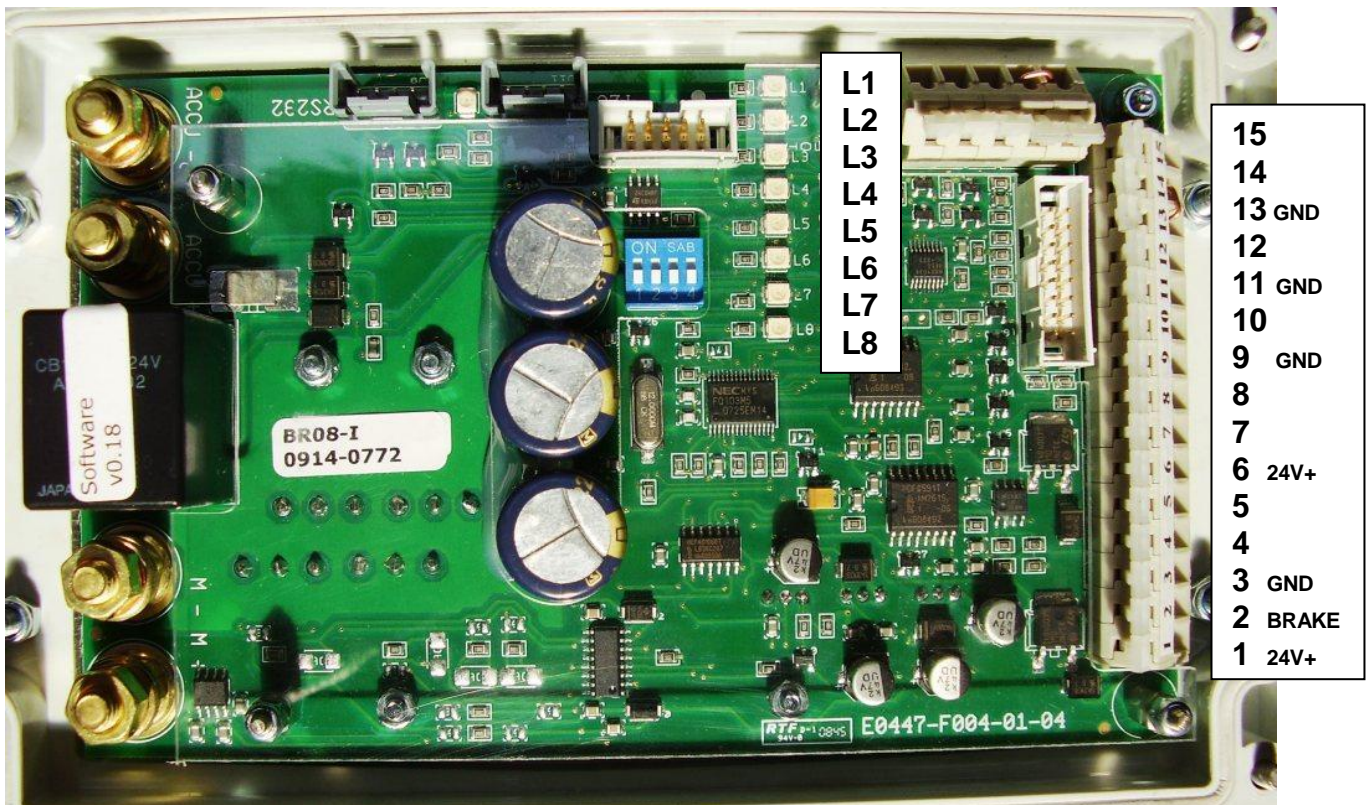

**Note!** The wire between 8 and 15 is not needed anymore.

The wire between 13 and 14 is needed when the machine has no hydraulic lifting wheels.  
If there are hydraulic lifting wheels connect the wires from the limit switch on 13 and 14!

**Special note for Meto Spray trolley.**

The (blue) wire at connection nr.2 at the old BR08 Board, must be installed on connection nr.3 on the new BR08I Board.

**Product info BR08I circuit board**

### Dip switch adjustment:

Dipswitch: 1234	Function (default setting #)	Characteristic/Function
ON/OFF 0000	Pipe rail trolley (BRW SP25) #	Tumbler switch * (direction push button)
ON/OFF 0001	Pipe rail trolley (BRW SP25)	Tumbler switch * (direction turn switch)
ON/OFF 0010	Pipe rail trolley (BRW SP15) #	Gas/brake button on console
ON/OFF 0011	Pipe rail trolley (BRW SP15)	Gas/brake button (Deceleration sort)
ON/OFF 0100	Roses trolley 1	
ON/OFF 0101	Roses trolley 2	Photocell active depends of direction
ON/OFF 0110		
ON/OFF 0111		
ON/OFF 1000		
ON/OFF 1001		
ON/OFF 1010	Hose reel circuit board #	Meto from s/n 431 2007
ON/OFF 1011		
ON/OFF 1100		
ON/OFF 1101	Meto Trans #	Deceleration sort
ON/OFF 1110		
ON/OFF 1111	Meto spray trolley <2007 #	To s/n 430 (Deceleration sort)

\* Tumbler switch for pedal function is located in box near key switch.

### Indicate LED overview:

Dip switch (termi.)	0010 / 0011	0000 / 0001	1110 / 1111	1100 / 1101
Funcie	Pipe rail trolley B9-SP15	Pipe rail trolley SP25	Meto spray trolley	Meto Trans
LED 1 (14)	Limit lifting wheels	Limit lifting wheels	Blockade (13-14 NC)	Blockade (13-14 NC)
LED 2 (10)	Pedal 2	Pedal 2	Bumper rear	Hose reel
LED 3 (2)	Parking brake output	Parking brake output	Extra output (R1)	Extra output (R1)
LED 4 (12)	Pedal 1	Pedal 1	Drive	Drive
LED 5 (7)	Input backwards	Switch pedal function	Bumper front	N.C.
LED 6	Buzzer output	Buzzer output	Backwards	Backwards
LED 7	Button pedal function	Button pause	N.C.	N.C.
LED 8	Button direction	Button direction	N.C.	N.C.
